

## COLLECTION AND PROCESSING SERVICES PROVIDED:

**Closed "HL5" container:** This walk-in container is fully lockable and has a padlock slot, allowing security of material at all times. All containers provided are refurbished and repainted and come with full "Highlander Paper recycling" livery. They are aesthetically pleasing and easy to load by hand. This container is ideal for loose or small bales of cardboard, material for document destruction (E.g. Bags / archive boxes / loose) or any waste paper that needs to be kept safe and secure. These are ideal for areas with space and / or height restrictions and is perfect for moderate volumes of waste (Up to 2 tons capacity)

**Open top "HL5" container:** This walk in container is fully lockable and has a padlock slot allowing security of material at all times. All containers provided are refurbished and repainted and come with full "Highlander Paper recycling" livery. They are aesthetically pleasing and easy to load by hand or over the top of the container using mechanical means. This container is ideal for loose or small bales of cardboard, printers waste, or other loose recovered paper. These are perfect for areas with space and / or height restrictions and ideal for moderate volumes of waste (Up to 2 tons capacity)

**Compactor "HL5" container:** These containers are specially designed to attach to compactor machinery allowing optimum payloads of recovered paper. All containers provided are refurbished and re-painted and come with full "Highlander Paper recycling" livery. They are aesthetically pleasing and in conjunction with a suitable compactor system, are ideal for loose cardboard, printers waste, production spoils, converting operations, or any waste paper that needs to be kept safe and secure. These are ideal for areas with space and / or height restrictions and perfect for higher volumes of waste (Up to 4 tons capacity)

**Cages / stillages / tubs:** These collection systems are ideal for areas that have high volumes of waste spread across wide areas, or ideal for internal storage of waste before being brought to a central point for collection. Tubs and cages are robust and easily moved by forklift or pallet truck and are used by a wide range of customers from printers to mailing companies. Stillages can be used for large and small reel ends of waste paper as they provide an internal collection system and are used to transport reel ends from point of generation to our facility, for eventual processing and recycling.

**Bags and tags:** Ideal for smaller amounts of office paper for recycling or papers for security shredding, these bags are made with heavy duty polythene, designed for single use only and to hold office type papers safely and securely. For security shredding bags, we also supply red numbered tags to allow both material security and a full audit trail from point of collection to final destruction.

The above would be collected using either Roll on/off, curtain side or tail lift trucks as appropriate to the job.

### Our processing services are detailed as below:

- 1 x Bigro 120, automatic baling press with 18 metre feed section, capable of processing up to 30 tons per hour
- 1 x Imabe H100 automatic baling press with material distributor and processing capacity up to 20 tons per hour
- 1 x BOA HRSM 25/40T, 2.2 metre reel splitter, with lifting ramp and both feed and ejection conveyor systems
- 1 x PAAL PGS 6540V, automatic baling press, utilised within our material destruction and shredding centre
- 1 x Product Destruction, High speed Hammer-mill machine with both in-feed and out-feed conveyor systems
- 1 x Slow speed Ulster 45 Security Shredding unit, with twin motors, short-bed feed hopper & 15.5mm cut size

## THE START OF OUR JOURNEY

Welcome to the brochure of Highlander International Recycling! The company was formed in 2002 by Brian Bingham and Stephen Duffy - our current Managing Directors – who are both seasoned Paper Recycling professionals, combining circa 60 years of experience within the Paper Recycling Industry, and now assisted by colleagues with a combined experience of another 60 years!

## ABOUT US

Our genesis in International recovered paper trading, has now evolved to that of an all-inclusive provider of local Paper Recycling Solutions. This evolution allowed expansion of our service portfolio to paper collection, grading and baling, along with other ancillary services such as reel handling and splitting, paper-based product destruction, confidential waste shredding and all our original services in recovered paper trading. This journey has taken over 15 years, during which Highlander has become one of the largest fully accredited paper recycling and trading companies operating within the Scottish and Irish markets as well as being trusted suppliers of recovered paper products to European and International markets. We physically handle and process over 35,000 tonnes of paper per year at our depot and further trade another 100,000 tons, comprising various grades of recovered paper.

## HIGHLANDER TO PRESENT .....

Over fifteen years on, Brian and Stephen now head up a team of motivated, like-minded individuals all committed to providing the very highest standards of service to our customers. Visit our web site for an insight into the key members of our team {[www.highlanderinternational.co.uk](http://www.highlanderinternational.co.uk) - search "The Highlander Clan"}. We strive to enhance your recycling experience to one which is competitive, safe and environmentally friendly, as well as being legally compliant with all

stipulations under current waste and recycling legislation. Highlander operations are guided by the internationally recognised quality standards of ISO 9001, ISO14001 & OHSAS18001, giving you peace of mind that we handle your waste diligently, safely and professionally, to the highest possible standards at all times.

## CENTRAL LOCATION

Strategically located in East Kilbride with easy access to M77/M74/M73/M8/M80 motorways, we have all the facilities expected from a modern, purpose built 66,000 sq ft Paper Recycling Centre! Equipped with three fully automatic baling machines being an Imabe H100, Lindemann Bigro 120 and PAAL PGS 6540V baling machines, giving us a total baling capacity of over 1800 tonnes per week – one of the largest capacities in Scotland. This recent investment, coupled with further investment in shredding, transport and collection systems now allows Highlander to offer a wide range of paper recycling services to Central Scotland businesses and in this endeavour, we are now the premier independent recovered paper recycling company in Scotland.

## BALING AND HANDLING FACILITIES

As well as installation of three modern baling machines, we have also invested heavily in ancillary equipment thus allowing us to expand our range of service offerings to the market. We have the largest reel splitter in Scotland, a high-throughput product destruction Hammer-mill, slow speed security shredder and 6 x JCB Tele-handlers with quick release couplings that allow us to handle bales, reels and pallets of up to 3 tons. This efficient baling and processing equipment allows Highlander to provide an assurance to all waste producers that we are fully responsible for the collection, handling and marketing of your recovered paper for recycling, providing a full audit trail for all materials collected or delivered and then recycled, through our recycling centre.

## RECOVERED PAPER COLLECTIONS

We have a wide range of collection systems available to customers, ranging from containers, tubs, cages, bale and pallet collections for both security shredding, product destruction and standard recycling collections where required. We can also accept deliveries of clean recyclable paper and cardboard at our processing facility 5 days a week from 7am to 4pm. Please see overleaf for more information on the collection systems we can offer and we would be delighted to discuss your options in more detail, at your convenience.

## COMPREHENSIVE RECYCLING AUDITS

We offer all current and prospective customers a free of charge, no obligation recycling audit, which will identify the waste streams being generated and provide tailored recycling solutions and collection services, to reduce as far as practicable the amount of waste disposed to landfill, while increasing recycling rates and material values and significantly reducing disposal costs, for our customers.

## COMPANY CREDENTIALS

- Fully registered and compliant with Companies House and all UK Companies Act legislation
- Fully registered with the Scottish Environmental Protection Agency (SEPA) as a waste broker & carrier
